

Can you personalise your library?

When you are ready to set up your video library, we will provide you with login details for the staff members involved in managing the platform.

They will have 'Admin' rights, and will be able to personalise the library according to your organisation's needs and style.

Firstly, you can add your own logo, contact details, social media links and edit the title of the library.

Top Tips / Alcohol

You can then go on to make changes to the content, such as removing or adding pages.

Once you're within a page, you can hide categories or videos that are not relevant to your organisation. You can also hide individual videos if you do not feel they are appropriate.

In the resource section, you can add links to other websites and PDF documents that signpost users to other informative sources that might be of interest.

If you need help personalising your library or wish to add your own videos, please talk to your Health and Care Video contact.
